

JEWEL THOMAS

Financial Analyst · ACCA Part-Qualified (FR · AA) · MSc Accounting & Finance (Merit)
Sheffield, UK · jewel.thomasaby12@gmail.com · linkedin.com/in/jewelthomas-

Graduate Route Visa (PSW) · Valid until November 2027 · Seeking Skilled Worker Sponsorship + ACCA Study Support · Available Immediately

PROFESSIONAL PROFILE

Financial analyst with four years of institutional REIT portfolio experience under IFRS and US GAAP, ACCA part-qualified (5/13 papers, including Financial Reporting and Audit & Assurance), and a Merit-grade MSc in Accounting and Finance from Sheffield Hallam University (2025). Research specialism in AI-driven financial strategy across FTSE 250 and UK FinTech firms. Proven track record in multi-entity financial reporting, advanced Excel automation, cross-functional financial data validation, and client-facing stakeholder management. Seeking a UK-based finance role — in practice, industry, NHS, or consulting — that offers structured ACCA study support and Skilled Worker visa sponsorship.

| ▸ Multi-entity Portfolio Reporting | ▸ Structured Data Reporting |
| ▸ Financial Data Validation & QA | ▸ Business Performance Analysis |
| ▸ AI-Driven Financial Strategy | ▸ ESG & Sustainability Reporting |

PROFESSIONAL EXPERIENCE

Machine Operations Lead Part-time
Cerealto · Worksop, UK (On-site)

Apr 2026 – Present

Production leadership role taken alongside active finance job-searching and ACCA study. Promoted from Operations Support to Machine Operations Lead within six months, assuming full accountability for a 50+ person shift team across a 24/7 manufacturing environment.

- Responsible for hourly output tracking, packing traceability, quality metrics, and real-time staffing coordination across a contract manufacturing operation with client-specific SOPs.
- Consolidated fragmented shift data into structured daily management reports, applying financial reporting discipline to operational data — giving leadership clear and consistent visibility of throughput performance.

Role taken during MSc Accounting and Finance studies to maintain UK employment continuity. Worked across inbound, outbound, and manual sorting operations. Demonstrated consistent reliability, throughput accuracy, and team coordination in a high-volume logistics environment.

Four-year financial analysis role within nRoad's financial services division, supporting institutional REIT clients across the United States. Managed multi-entity client portfolios under IFRS and US GAAP reporting standards, with full accountability for monthly and quarterly financial deliverables. Also contributed as a core member of the product testing team for Convus — nRoad's flagship financial data platform.

Convus Platform — Financial Data Validation & QA

- Core member of the six-person Convus product testing team: processed financial statements from US REIT companies, validated debit/credit classifications against source documents, and identified back-end data discrepancies during the platform's embedding and annotation pipeline.
- Designed and built an Excel-based discrepancy triage and routing automation that classified error types (annotation errors vs. back-end engineering issues), flagged items requiring data engineering or software developer intervention, and routed them to the correct teams at end-of-day — maintaining output throughput without manual bottlenecks or pipeline disruption.

Financial Reporting & Portfolio Management

- Managed 200+ monthly transactions across multi-entity REIT client portfolios under IFRS and US GAAP reporting standards, maintaining 98% accuracy with zero missed deadlines across four years.
- Built advanced Excel models using dynamic referencing, VLOOKUPs, and Pivot Tables that reduced the monthly financial reporting cycle by 80% — from approximately 10 hours to under 2 hours.
- Financial analysis across REIT client portfolios contributed to a 2% reduction in client investment costs and a 5% expansion in addressable market.
- Conducted stakeholder management across client teams, translating complex financial data and reporting outputs into actionable insights for non-technical audiences including compliance, operations, and executive stakeholders.

EDUCATION

Grade	2:1 Merit
Dissertation	"The Role of AI-Driven Financial Strategies in Enhancing Business Performance" — examined AI adoption in FTSE 250 and UK FinTech firms through comparative case-study analysis of annual reports, industry data (McKinsey, Deloitte, PwC, EY), and financial KPIs including ROE, EBIT margin, and cost efficiency ratios.
